Work Experience

Fidelity International Canada   May 2024 – Aug 2024
Software Developer Intern | Toronto, ON

- Enhanced the industry leading uniFide® application, leveraging the **Angular framework** and **Java Spring Boot** to successfully resolve 10+ defects in production whilst conducting thorough **peer code reviews**
- Developed and integrated a new **Angular component** for a revamped forms library page, contributing over 200 lines of code to the **front-end.** This was a high priority item that was included as part of a major release demo
- Responsible for remediating several critical security vulnerabilities found by **penetration testing**, securing the platform
- Collaborated in a cross-functional team using **Agile methodologies (Scrum framework)**, and **JIRA,** fostering effective communication with quality assurance and business analyst teams

International Financial Data Services (IFDS)   May 2023 – Dec 2023
Information Security Intern | Toronto, ON

- Led company-wide phishing simulation programs using **PhishMe** to assess 800+ employee's susceptibility to phishing
- Actively monitored several daily reports using **MS Excel** and **Forcepoint** for potential breaches of PII data
- Oversaw the design of multiple department sites on the company intranet using **SharePoint** and **MS Office**
- Utilized **ServiceNow** for quarterly access reports, ensuring accurate user permissions across company systems

Co-Curricular Experience / Projects

Fidelity International AI Case Competition Finalist   Aug 2024
Fidelity International Canada | Toronto ON

- Collaborated with a team to present an innovative **AI automation** solution for the finance industry to a panel of Fidelity Canada executives, conducting thorough market research, competitive analysis, and finishing in second place
- Designed a detailed prototype app front-end using **Figma**, and articulated a strategic business plan including marketing, operations, and financial strategies

onQ Platform Google Extension   June 2024
Google Extension | https://github.com/21KLA5/D2L-Extension

- Developed and **published** a Chrome extension to **automate** the process of tracking and displaying current grades from Queens University's onQ platform (Queen's learning management system)
- Leveraged the Chrome **API** and **DOM manipulation** techniques to implement scripts that dynamically extract and update data from the onQ grades tab

QWEB Web Development General Member   Sep 2022 – Apr 2022
Queen's University | Kingston, ON

- Engaged in extra-curricular web development workshops and developed skills in **HTML, CSS, JavaScript, and React**
- Designed and developed responsive **personal portfolio website** using **React**
